If you have additional notes or comments regarding your group member's contributions, feel free to put them below:

Ryan, Ruei-E and Ethan could control the conversation very well, though I think Ethan was overworked by other modules.

I don't talk much during group discussions cos I have a hard time formulating my thoughts, but I do make up for it by spending a lot of time on the report and presentation. I was paired with Poomklao for doing the section on Current Measures for both the report and presentation, but I realise that I'm the one doing most of the work there, even when I tried to purposely leave some of the parts empty for him fill up. I had to fill up those sections very close to the due date myself.

But overall, everyone showed up for almost every meeting and contributed.
